Introduction

This document details hardware and software requirements for the SAP Business One full product version within a typical client-server configuration and within hosted environments. In addition, the document details memory requirements for SAP add-ons.

Caution:

Before you start the implementation, make sure you have the latest version of this document. You can find the latest version in the **SAP Channel Partner Portal** at the following internet address:

Document History

The following table provides an overview on the most important document changes.

Version	Date	Description
1.0	03/13/2008	Initial version
2.0	08/26/2008	Addition of Windows XP in "Supported workstation platforms" and VMWare ESX 3.0 - in the "Supported server platforms"
2.0	01/21/2009	Addition of Microsoft® Windows Server 2008 in "Supported server platforms"
2.0	03/11/2009	Addition of Microsoft® SQL Server 2008 in "Supported database platforms"
3.0	04/01/2009	Addition of VMWare ESX 3.5 in the "Supported server platforms" and SAP Business One 8.8 requirements

Hardware requirements

This section lists the hardware requirements for SAP Business One.

Minimal hardware requirements for non-hosted environments

The table below lists the minimum hardware requirements for SAP Business One servers.

Component	2005 Release	2007 Release	8.8 Release	Notes and Comments
<i>Processor</i>	1x Intel Pentium 4 (or equivalent)	1x Intel Pentium 4 (or equivalent)	1x Intel Pentium 4 (or equivalent)	Note: Dual-core processors are supported by SAP Business One on both client side and server side.
<i>Memory</i>	1GB	1GB	1GB	Note: For over 10 users, please refer to the Best-Practice System Setup and Sizing Document for further information.
<i>Free Hard Disk</i>	System partition 0.5 GB	System partition 0.5 GB	System partition 0.5 GB

* Use Multiple Add-on Mechanism to share DI connection through UI API

Hardware requirements for hosted environments

The table below lists the minimum hardware requirements for hosted environments.

RAM Requirements

CITRIX XenApp Edition or Windows Terminal Services hardware requirements, as stipulated by the manufacturer.

Per user:

- SAP Business One application – 60MB~80MB
- Citrix Client Session – For recommended requirements, refer to Citrix documentation
- Each DI API Add-On using Multiple Add-on Mechanism adds a minimum of 25MB (first launched add-on adds a minimum of 60MB). For recommended requirements, contact your solution provider.

Example:

Your system is required to run:

- 4 SAP add-ons
- 1 solution add-on
- 10 SAP Business One users

Calculate the required memory as follows:

- All add-ons require 60MB x 1 SAP add-on + 25MB x 3 SAP add-ons + 60MB x 1 solution add-on = **200MB~300MB** for all five add-ons
- Each user requires 60MB~80MB (application) + 200MB~300MB (Add-ons) + 40MB~50MB (Citrix session) = 300MB~430MB x 10 users = **3GB– 4GB** in total

Supported dot-matrix printers

The following dot-matrix printers are supported by SAP Business One.

- Citizen PROdot 300
- Epson FX-880
- OKI MICROLINE 320 Elite

Note:

SAP Business One does not support integrated printers (printer / fax / scanner / copier combined machines).

Software requirements

This section lists the software requirements for SAP Business One.

Note:

- Only the English platform versions are supported. Operating systems in other languages are supported as long as the issue is not specific to the operating system in a particular language
- Effective immediately, SAP will test only major versions of Microsoft's operating systems, databases and Office software products. Service Packs delivered by Microsoft in the course of a product's lifecycle will no longer be tested separately, but will automatically be officially supported for SAP Business One.
- If a customer or partner encounters an issue with any of the Microsoft product Service Packs, SAP will solve this issue on a case-by-case basis as a bug (historically low rate of occurrence).

Supported database platforms

The table below lists the supported database platforms.

Supported Database Platforms	2005 Release	2007 Release	8.8. Release
Microsoft® SQL Server 2008 32-bit/ 64-bit (x64) Express, Workgroup, Standard & Enterprise Edition Note: Please read the Hardware and Software Requirements for Installing SQL Server 2008 as outlined by Microsoft® Corp.		X ⁽⁶⁾	X
Microsoft® SQL Server 2005 Standard/Enterprise Edition 32-bit/64-bit (only on Windows 2003 Server) or Microsoft® SQL Server 2005 Express/Workgroup ⁽³⁾ Edition 32-bit	X ^(4,5)	X ⁽⁵⁾	X
Microsoft® SQL Server 2000 Standard/Enterprise Edition	X	X ⁽¹⁾	
IBM DB2 Express 8.2 FixPak 2	X		
IBM DB2 Express 9.1 FixPak 2		X ⁽²⁾	

(1) Caution: Only for upgrading customers and until end of maintenance program — April 2008.

(2) Supported as of 2007 A PL11.

(3) SQL Server 2005 Workgroup Edition is only supported with Windows Small Business Server (SBS) 2003 and only in 32-bit mode.

(4) This is relevant as of the SAP Business One 2005 SP 01 release, and only on Windows 2003 Server operating systems. This applies to all 2003 server versions including SBS.

(5) As of SAP Business One Release 2007 A PL39 and 2007 B PL04, the application supports Microsoft SQL Server 2005 Express Edition. Before installing, make sure that you carefully read the [Installation Guide for 2007 A / 2007 B on MS SQL Server 2005 Express Edition](#), also published in [the Documentation Resource Center](#), and consider the system limitations with respect to database size, productive users, and more.

(6) Supported as of 2007 A PL47 and 2007 B PL10

Note: SAP Business One does not support Itanium-based 64-bit (ia64) server platforms or any other UNIX derivatives.

Supported server platforms

The table below lists the supported server platforms.

Additional Software requirements

The table below lists the software requirements for servers.

Software Requirements Server
Microsoft® Internet Explorer 6.0 or higher
Microsoft® Data Access Components 2.6 (MDAC) or higher
Microsoft® .NET SDK
Note: Only for systems running the IBM DB2 Universal Database Express edition

The table below lists the software requirements for clients.

Software Requirements Client
Microsoft® Internet Explorer 6.0 or higher
Microsoft® Data Access Components 2.6 (MDAC) or higher
Note: To send faxes from SAP Business One, it is recommended to install Microsoft® Fax Services. Symantec WinFax Pro 10.0 is no longer supported by Symantec, but may be used with SAP Business One if it is already installed.
